

# INFORMATION TECHNOLOGY

What kind of organizations could you work for?

- > Computer Programming Services
- > Computer Systems Design Services
- > Software Publishers
- > Corporate Headquarters
- > Local & State Government
- > Colleges & Universities

The question isn't who needs IT workers. The question is who *doesn't*.

Information technology is the technology used to store, manipulate, distribute or create information. It has revolutionized how we live and communicate and is a critical part of every organizations infrastructure. The rate at which technology changes has put IT professionals in high demand.
